

Internship Workplan

Identify Customer Segments for Online Retail using K-Means Clustering

Component 1 – Getting Started

Objective	Understand problem, tools, and internship flow
Activities	Intro videos, overview, workplan creation
Deliverables	Filled workplan sheet, problem understanding note

Component 2 – Research

Objective	Understand e-commerce analytics & segmentation
Focus Areas	RFM, personalization, marketing use cases
Deliverables	1–2 page research summary

Component 3 – Data Preparation

Objective	Prepare clean dataset for clustering
Tasks	Feature engineering, cleaning, scaling
Deliverables	Clean CSV, EDA report

Component 4 – K-Means Clustering

Objective	Build and analyze customer clusters
Methods	Elbow method, Silhouette score
Deliverables	Notebook, cluster insights

Component 5 – Final Submission

Objective	Professional presentation of findings
Artifacts	Slides, code, report
Deliverables	Final submission
